If you implemented Batch Norm on mini-batches of (say) 256 examples, then to evaluate on one test example, duplicate that example 256 times so that you're working with a mini-batch the same size as during training.

10。Which of these statements about deep learning programming frameworks are true? (Check all that apply)

Deep learning programming frameworks require cloud-based machines to run.

*法择的是正确的

Even if a project is currently open source, good governance of the project helps ensure that the it remains open even in the long term, rather than become closed or modified to benefit only one company.

正确

A programming framework allows you to code up deep learning algorithms with typically fewer lines of code than a lower-level language such as Python.
